

Background

Silverline Audio Technology was incorporated in California, USA in 1996. Silverline Audio manufactures high-end, premium quality loudspeakers at affordable, sensible and realistic prices. Our loudspeakers are not made just for great sound, but are intended to be associated with the finer things in life. Our loudspeakers are made for those who are concerned with aesthetics as well as sound.

Application

Silverline offers a new standard to the discriminating audiophile, delivering a level of performance, service, craftsmanship and value that has not been available until now. Every pair of Silverline loudspeakers is slowly and carefully hand crafted. This meticulous approach results in the most linear, time-coherent, distortion-free sonic presentation possible. Silverline speakers are extremely sensitive with high power handling capacity and optimized transient response: specially dedicated to music and movie lovers who will accept no compromises for their music rooms and home theaters.

Philosophy

"If music be the food of love, play on ..." --- William Shakespeare.

Our passion for music --- both live and reproduced --- is the driving force for the production of our high-performance loudspeaker system.

Performance

About Silverline Audio
